

**Green Goddess Nursery, Inc. or Earthstone Containers and
Design Casting
4139 E. Bell Rd.
Phoenix, Arizona 85032
602-971-8110 * 1-800-428-4612**

To Whom It May Concern:

The Earthstone products that are used in a fire application must follow the following setup rules: The concrete bowl must be insulated with lava rock or firebrick. If the bowl is not properly insulated it will crack and pit. Throwing bits and pieces out. **BE SURE** and fill the bowl full of lava rock or line it with firebrick.

FIRE BOWL SETUP

- 1.) Place bowl in a well ventilated area. Do not place it under a roof.
- 2.) **Fill bowl with Lava Rock. Do not use sand or hard rock gravel. Fill the bowl to within about 1 ½” to 2” from the top. You may also line the container with firebrick.**
- 3.) Make sure bowl can drain so when it rains the water can drain out of it.
- 4.) If use a gas ring place the ring with the jets facing down and cover it with Lava Rock. This way your fire will look more natural. **Follow the proper gas connections for the code in your city or county. FIRE RING MUST HAVE 4” TO 6” CLEARANCE FROM ANY BOWL SURFACE.**
- 5.) You can take the gas intake through the bottom of the bowl and set the on and off valve in a non visual area with easy access and **to code**. Make sure it is where children or anyone cannot play with.
- 6.) Make absolutely sure that all gas or fire setups are to the **CODE** in the City, County and State that you are using the product in.

Greenn Goddess, Inc. or Earthstone is not responsible for any fire or gas setups.
